

Our Services

With over 50 years experience in industrial engraving, Brunel Engraving Company has built its success and reputation on its investment in the very latest engraving technology and equipment.

Our engraving craftsmen are trained to the highest standards in the UK enabling them to tackle the most complicated procedures and to provide custom engraving services to your requirements whilst still maintaining attention to detail and prompt delivery.

With all our departments networked together and using the latest software Brunel Engraving Company can import and export files to support the production process.

Our commitment to each project is unsurpassed offering our custom engraving services to your precise requirements. Nothing is too complicated for our craftsmen to manufacture to the highest possible standards. This means that we can supply a complete service to industrial customers.

We specialise in the engraving and supply of:

- Components
- Control Panels
- Electrical Labels
- Free Issue Stock
- Hydraulic Labels
- Identification Labels
- Industrial Signage
- Lift Panels
- Machine Nameplates
- Mimic Diagrams
- Reverse Engraving
- Scales and Dials
- Serial Plates
- Switch Plates
- Valve and Tag Labels
- Warning Labels

Our continual investment in the latest CNC engraving technologies, combined with our traditional engraving skills, allows us to engrave most materials and where required, to engrave to extremely fine tolerances, such as required for control panels and mimic panels. These typically require light and screw holes to be exactly positioned to precisely fit various kinds of equipment.

Engraved Control Panels
